

PPFP Global Meeting Follow-up Workshop

Country Posters

Afghanistan

Proudest Accomplishment since PFPF Global Meeting

Trained 12 family planning trainers in PFPF/PPIUD and developed plans to train 115 health care providers from 23 provinces in 4 regions in PFPF/PPIUD from December 2015 to February 2016. Established a sub-technical committee under CBHC/MOPH task force to work on the revision of community based PFPF EIC materials and the development of reporting, monitoring, and quality improvement tools.

Challenge Experienced in Accelerating PFPF

Insufficient involvement of men in family planning both in the supply and demand sides.

Request for PFPF Steering Committee Support

Work with policy makers to further support the MOPH FP program.

Bangladesh

Proudest Accomplishment since PFPF Global Meeting

MOHFW has given highest priority to PFPF in the next health sector program, which is a 5-year plan.

Challenge Experienced in Accelerating PFPF

Implant as an immediate PFPF method is yet to approved by NTC (National Technical Committee) and designing the PFPF package for the home deliveries.

Request for PFPF Steering Committee Support

Continued technical support to get endorsement of implant as immediate PFPF method as well as advocacy at the highest level to put all importance on PFPF.

Burkina Faso

Proudest Accomplishment since PFPF Global Meeting

After advocacy efforts, we are beginning the process to integrate PFPF of pre-service training for midwives and OBGYNs

Challenge Experienced in Accelerating PFPF

Mobilizing resources to revise necessary reproductive health political documents and protocols to integrate PFPF

Request for PFPF Steering Committee Support

Assistance in mobilizing resources to start our action plan by putting us in contact with partners and donors.

Democratic Republic of the Congo

Proudest Accomplishment since PFPF Global Meeting

Revised our national action plan to increase integration of PFPF and put in place a task-force of multi-disciplinary members to carry out recommendations

Challenge Experienced in Accelerating PFPF

Rendering available funds not only for start-up of the action plan but also for long-term, including availability of contraceptive commodities.

Request for PFPF Steering Committee Support

Mobilize resources for the start-up of our action plan.

Ethiopia

Proudest Accomplishment since PFFP Global Meeting

Service delivery expansion for PFFP accomplished through strengthening facility based PP family planning services, securing contraceptive commodities at all levels, promising/encouraging focus to long acting FP methods specially PP IUCD and ensure their availability at all levels, and community education and mobilization through the HEP, model families and HAD regarding PP family planning.

Challenge Experienced in Accelerating PFFP

Problem getting data on PPIUCD as it was not reported through HMIS.

Request for PFFP Steering Committee Support

India

Proudest Accomplishment since PFPF Global Meeting

Expansion of PPIUCD further with strengthening of onsite training and development of dedicated software to monitor the same

Challenge Experienced in Accelerating PFPF

Expansion of post partum sterilization for lack of dedicated programming and interest among providers

Request for PFPF Steering Committee Support

Further leverage global funds to have onsite mode in other states for training in PPIUCD/ IUCD

Indonesia

Proudest Accomplishment since PPFP Global Meeting

Advocating the results of the Chiang Mai meeting to the leadership of BKKBN and MoH resulted in a National Workshop for strengthening PPFP in Health Services. Outputs from the meeting included documents on: 1) the adoption of the MEC 2015; 2) Revitalization of PFP through the Hospital based FP; and 3) Provincial Plans of Actions for PPFP.

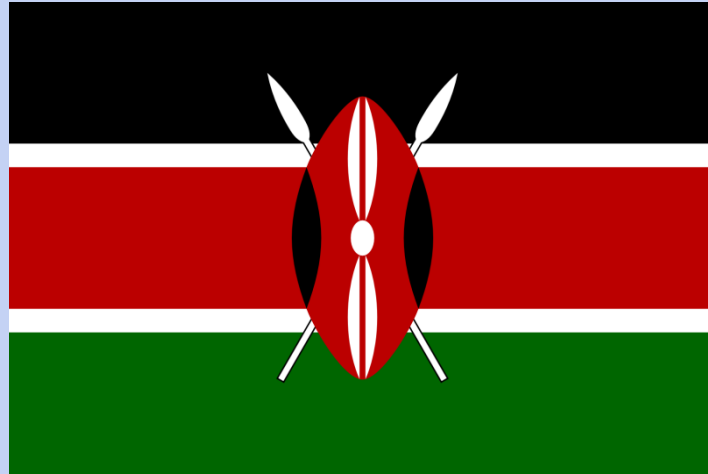

Challenge Experienced in Accelerating PPFP

Looking at how PPFP referral system is covered under the new National Health Insurance guidelines.

Request for PPFP Steering Committee Support

Consensus around the new MEC guidelines and convincing stakeholders/policymakers that implants are scientifically eligible for postpartum mothers. Currently IUD is the preferred methods, there is reluctance on implants.

Kenya

Proudest Accomplishment since PFPF Global Meeting

The Kenya team has managed to find opportunities to drive the PFPF agenda including FP guidelines revision to include PFPF, stakeholder engagement; GFF Kenya investment case prioritizes FP and proposes critical interventions, likely to impact PFPF agenda positively going forward; FP commodities projections for 2015/2016 funding fully met

Challenge Experienced in Accelerating PFPF

Lack of clear data on PFPF provided at the health facilities; low competence on removal of implants; provider bias overall; suboptimal efforts & resources in demand creation

Request for PFPF Steering Committee Support

Continued support as Kenya shapes the PFPF agenda and strategies, resources mobilization and advocacy funding support for identified barriers/bottlenecks

Madagascar

Proudest Accomplishment since PFFP Global Meeting

Signing on as a FP2020 commitment country, celebrating PFFP in the national family planning (FP) campaign, planning a scientific conference on innovations in FP, PFFP/PAC, and adolescent and community approaches.

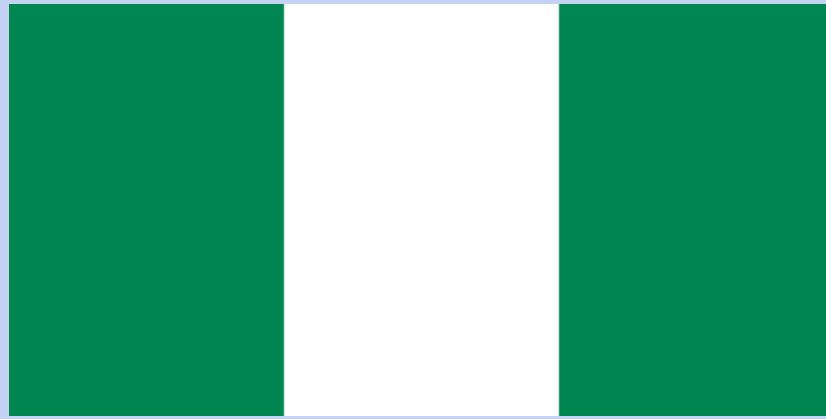

Challenge Experienced in Accelerating PFFP

Organization of the national conference to operationalize the action plan and FP2020 commitment.

Request for PFFP Steering Committee Support

Assistance with costing the action-plan and start-up for the FP2020 commitment and mobilizing resources to actualize these plans.

Nigeria

Proudest Accomplishment since PFPF Global Meeting

PPFP Stakeholders in Nigeria reached consensus on the need to update all FP materials in line with the 2015 MEC Guidelines and received support from bilateral and multilateral partners to move ahead with implementation.

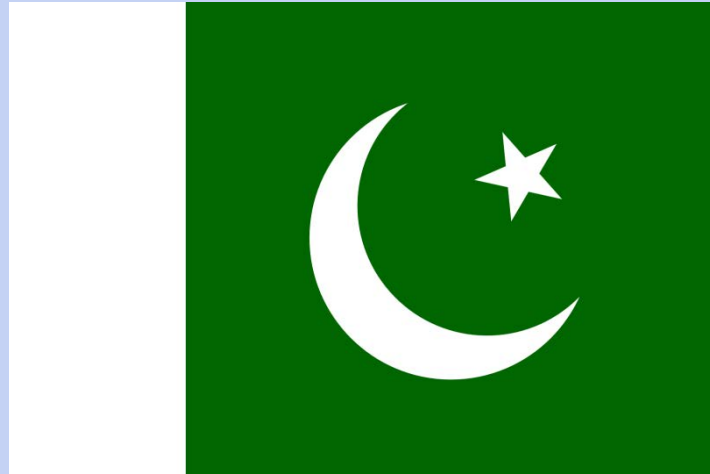

Challenge Experienced in Accelerating PFPF

Though national stakeholders have reached consensus on scaling up access to PFPF, implementation at the sub-national level is dependent of the State and LGA governments' willingness and commitment to the programs. Some states are being assisted to do so by donors and development partners (e.g. USAID, DfID, Gates, etc.) while some are not. There is a need to have a country-wide implementation plan.

Request for PFPF Steering Committee Support

Advocacy to more development partners to support PFPF scale-up programs in Nigeria in order to ensure that there are no orphan states in the country.

Pakistan

Proudest Accomplishment since PFPF Global Meeting

Commitment and dedication generated in the meeting at Chiang Mai.

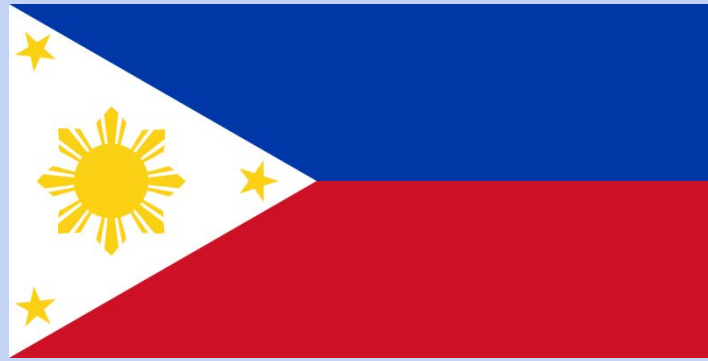

Challenge Experienced in Accelerating PFPF

Upscaling PFPF in Pakistan after piloting it in one district and developing six skill labs in Punjab now training to all the SBAs is a huge task.

Request for PFPF Steering Committee Support

Technical support from International steering committee.

Philippines

Proudest Accomplishment since PFPF Global Meeting

PPFP/PPIUD is now covered by PhilHealth, the national insurance scheme.

Challenge Experienced in Accelerating PFPF

Individual champions without an organizational framework have a difficult time pushing the program forward.

Request for PFPF Steering Committee Support

Assistance in organizing a national task force.

Rwanda

Proudest Accomplishment since PFPF Global Meeting

The PFPF strategy is not a matter of three persons who attended the Chiang Mai, Thailand meeting. Results from the meeting have been shared during FP-TWG meeting and there is high commitment of FP-TWG members and MoH who adopted a work plan to implement PFPF in health facilities.

Challenge Experienced in Accelerating PFPF

Permanent of the PFPF services is not always guaranteed for 24 hours at health facility because few number of trained staff which is in routine rotation (8 working hours out of 24h a day) within the health facility.

Request for PFPF Steering Committee Support

Scale up of PFPF at country level because for now, PFPF is only active in some districts.

Tanzania

Proudest Accomplishment since PPFP Global Meeting

Challenge Experienced in Accelerating PPFP

Request for PPFP Steering Committee Support

Uganda

Proudest Accomplishment since PFPF Global Meeting

Disseminated the MEC 5th edition to key stakeholders using different forums, secured funds for review of guidelines, and we are ready to build capacity for PFPF

Challenge Experienced in Accelerating PFPF

Mobilization of resources from FP stakeholders to contribute to PFPF that is currently not in their plans and budgets

Request for PFPF Steering Committee Support

Secure a budget to disseminate country wide (require more copies of MEC 5th edition wheels) and train health workers on LARC, including post-partum IUD

Zambia

Proudest Accomplishment since PFPF Global Meeting

Stakeholder engagement through the Ministry of Health led family planning technical working group to build consensus on process of inclusion of PFPF in Health Management Information System (HMIS)

Challenge Experienced in Accelerating PFPF

Competing indicator variables for inclusion into HMIS revision process

Request for PFPF Steering Committee Support

Technical and financial support to finalise the process of including PFPF indicators into HMIS
