

What women, girls and their partners want.

**Angela Mutunga
PPFP Global meeting
Thailand Chiangmai
8 – 11, July 2016**

What women, girls and their partners want

1. Women and girls do not want to die as they fulfill God's desire.
2. Those delivering at home, wish TBAS would help with all they need 24/7.
3. They have concerns about contraceptives, especially, explanations on side effects.
4. Many, especially adolescents, do not want another pregnancy soon after delivery, yet in many facilities or at home, no one offers them information on what to do.

What women, girls and their partners want

5. When women and girls come for contraception method, yet do not get their method of choice.

6. Women and girls wish their partners were more supportive and that someone can talk to them.

7. Men and PFP? Many men don't seem to know what they want, and rarely, talk about it in any of their circles.

So what to do?
