

Scaling up PPIUD services across India while ensuring quality of services

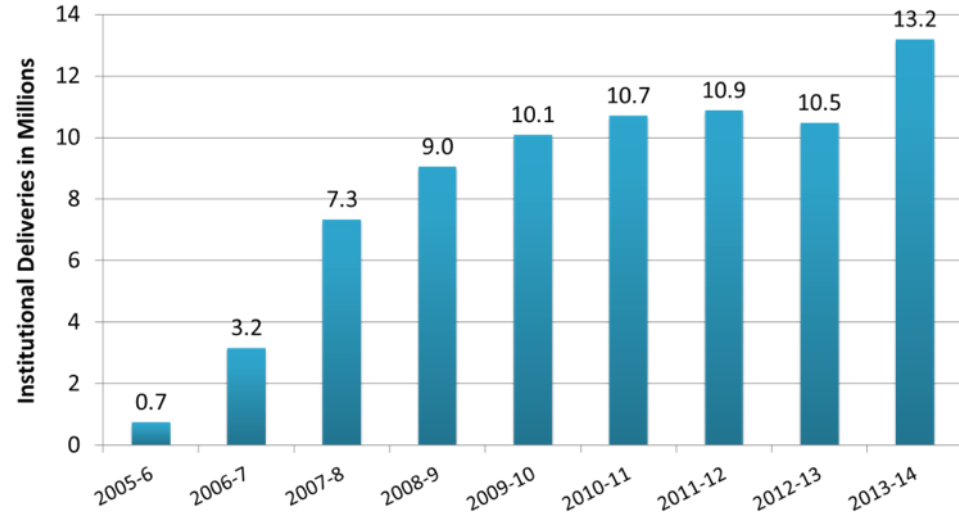

Bulbul Sood, Jhpiego/India

Why Postpartum Family Planning is Crucial for Family Planning?

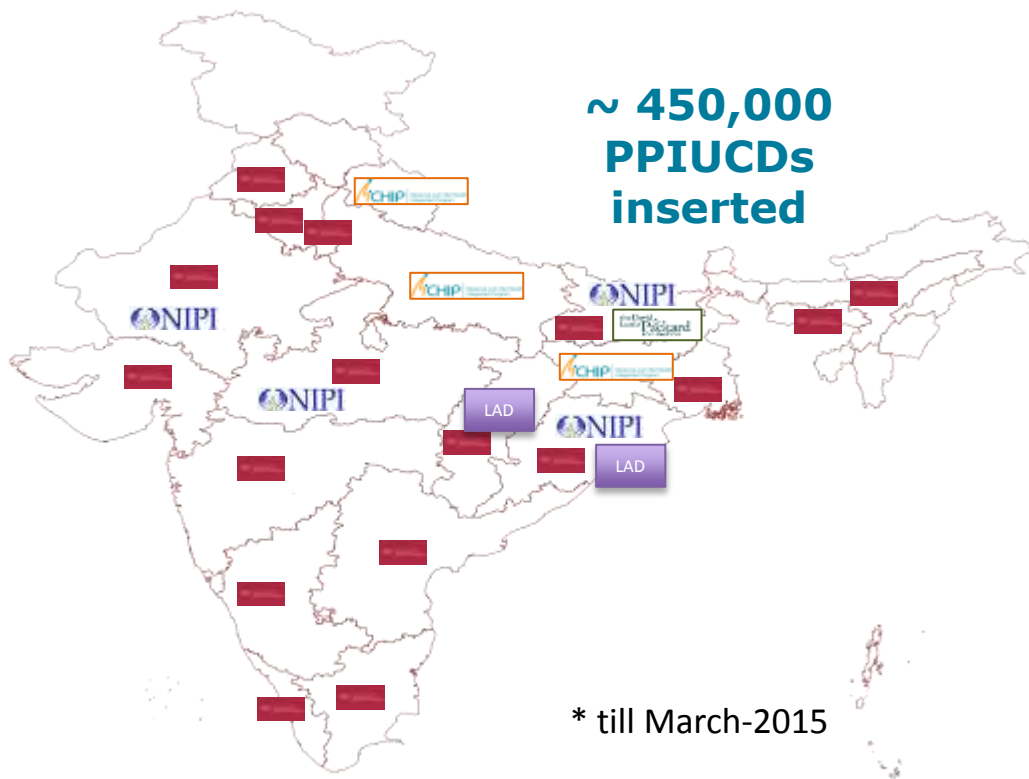

- Huge unmet need (73% in first 3 months)
- Birth-to-birth interval (57.6 % of births had birth interval of less than 36 months) *Source: SRS 2011*
- High vulnerability to unintended pregnancy (Due to low awareness)
- JSY was bringing women to facilities - are more receptive to accept FP methods

JSY Beneficiaries: 2005 to 2014

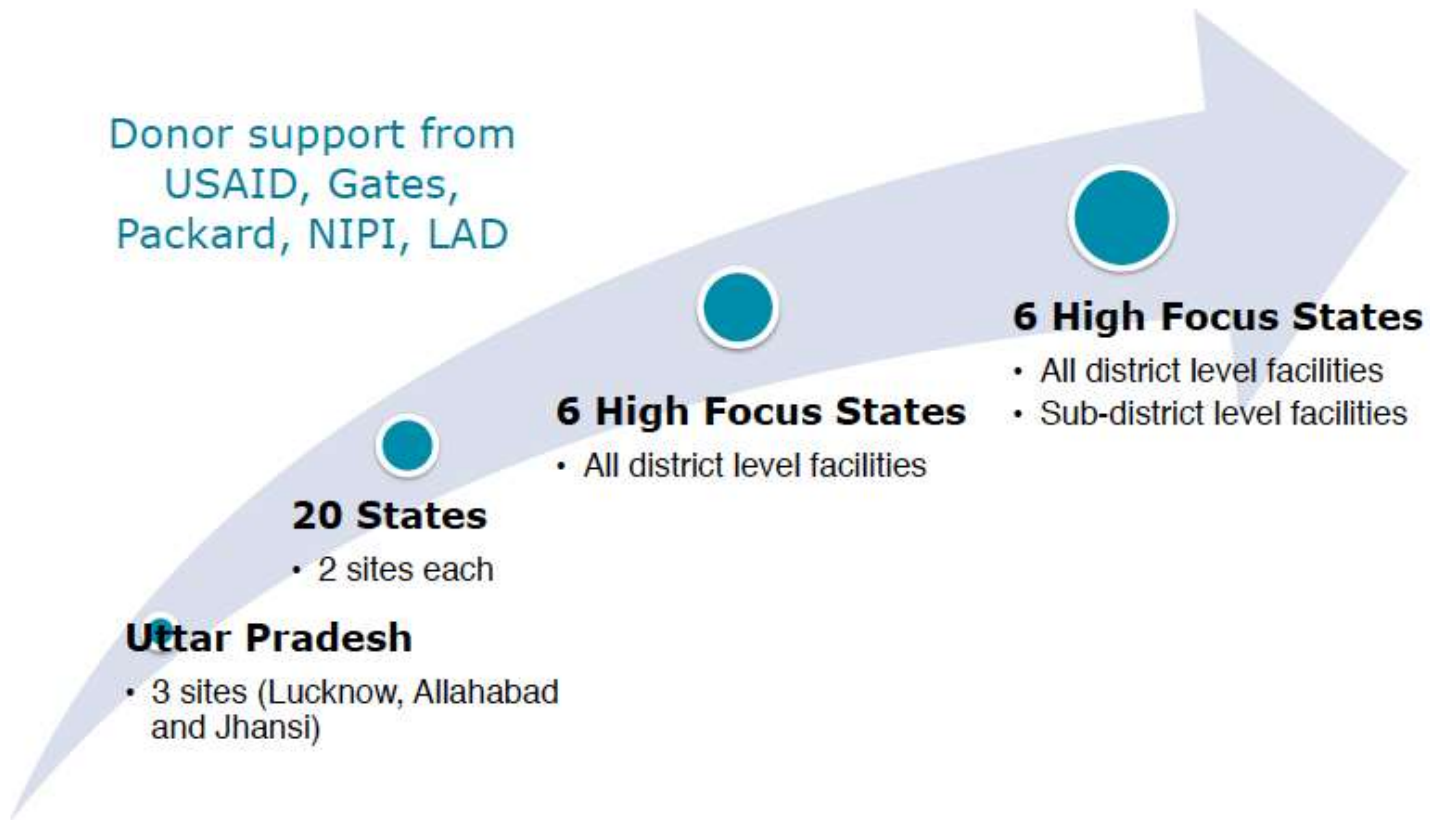

Source: HMIS, MOHFW, GoI

Rapid Expansion of PFP/PPIUCD Services: Impact at Scale

States	>20
Training Sites	75
Service Providers	
Doctors	3121
Nurses	6161
Service Delivery Sites	
Medical Colleges	44
District Hospitals	300
Sub District Facilities	673

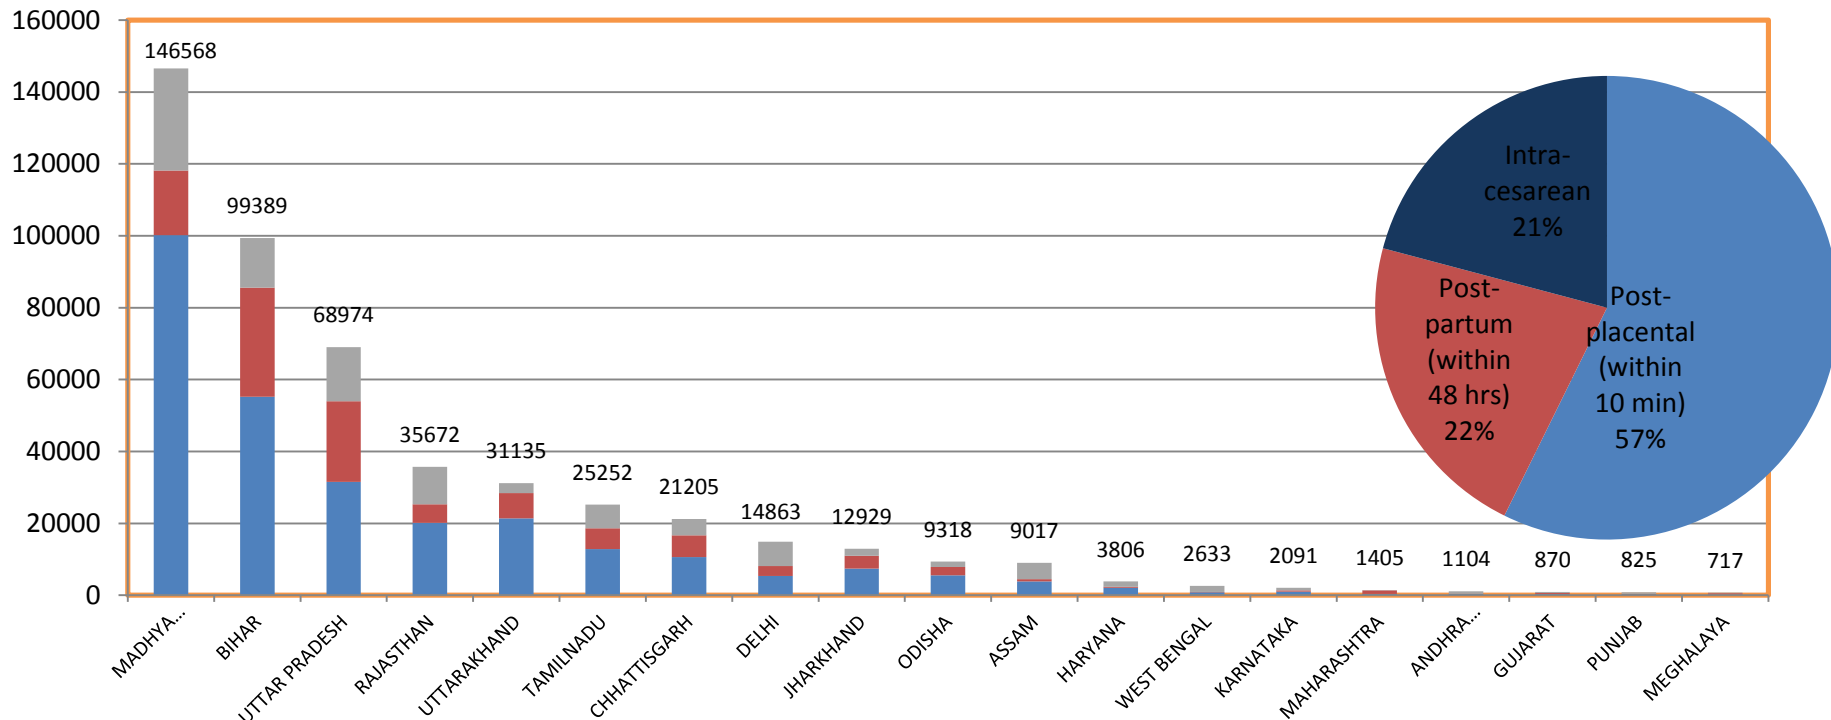

Phased Expansion of PFP/PPIUCD Services

PPIUCD Experience in India

N = 487,773

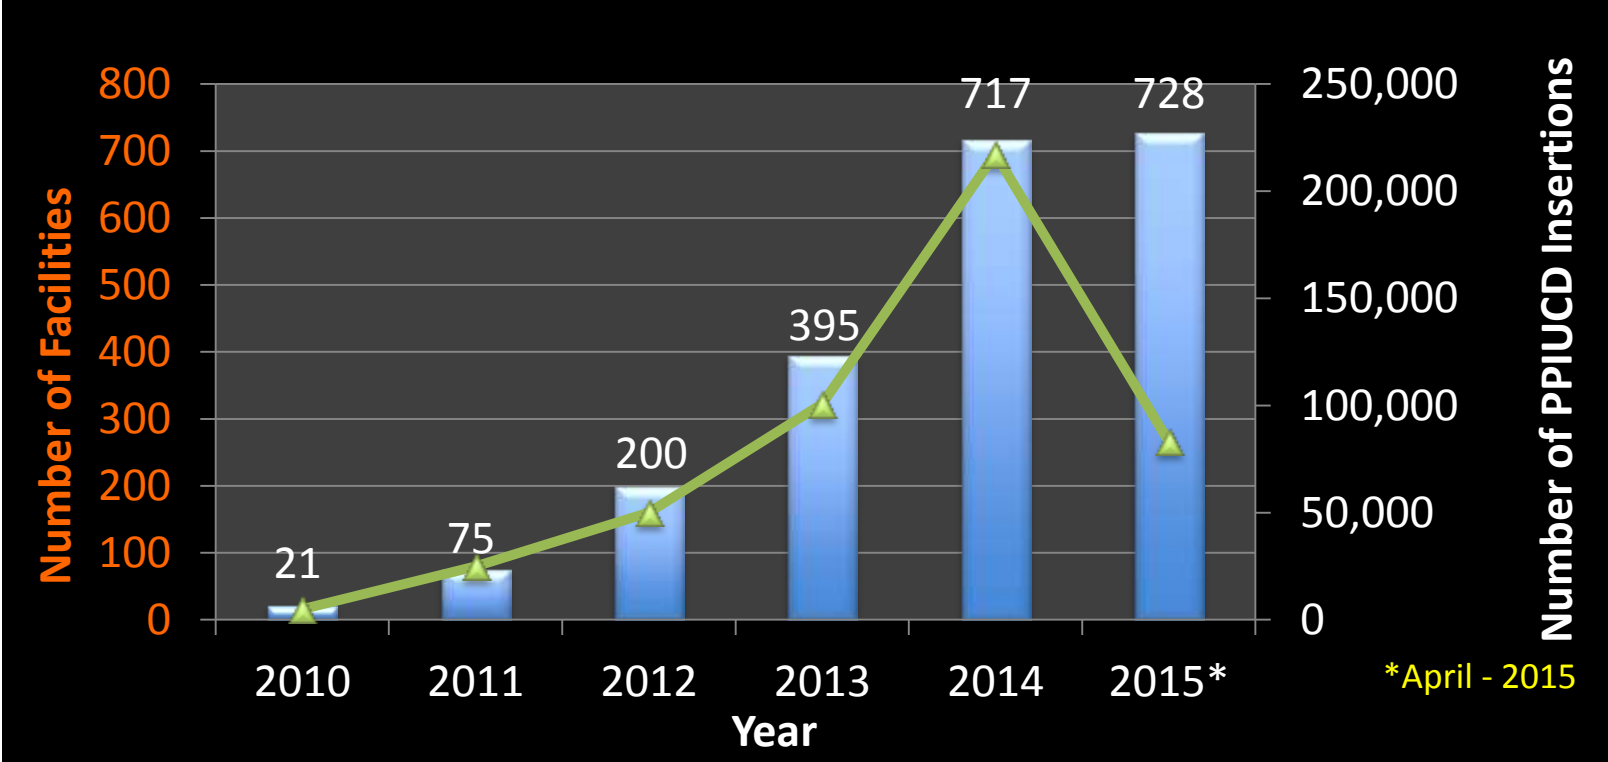

Total Reported PPIUCD Insertions Feb-10 to Apr-15

Data as on 01/06/2015

Source: PPIUCD Monthly reports

Trend of Number of Facilities Reporting PPIUCD Insertion Service Impact at Scale

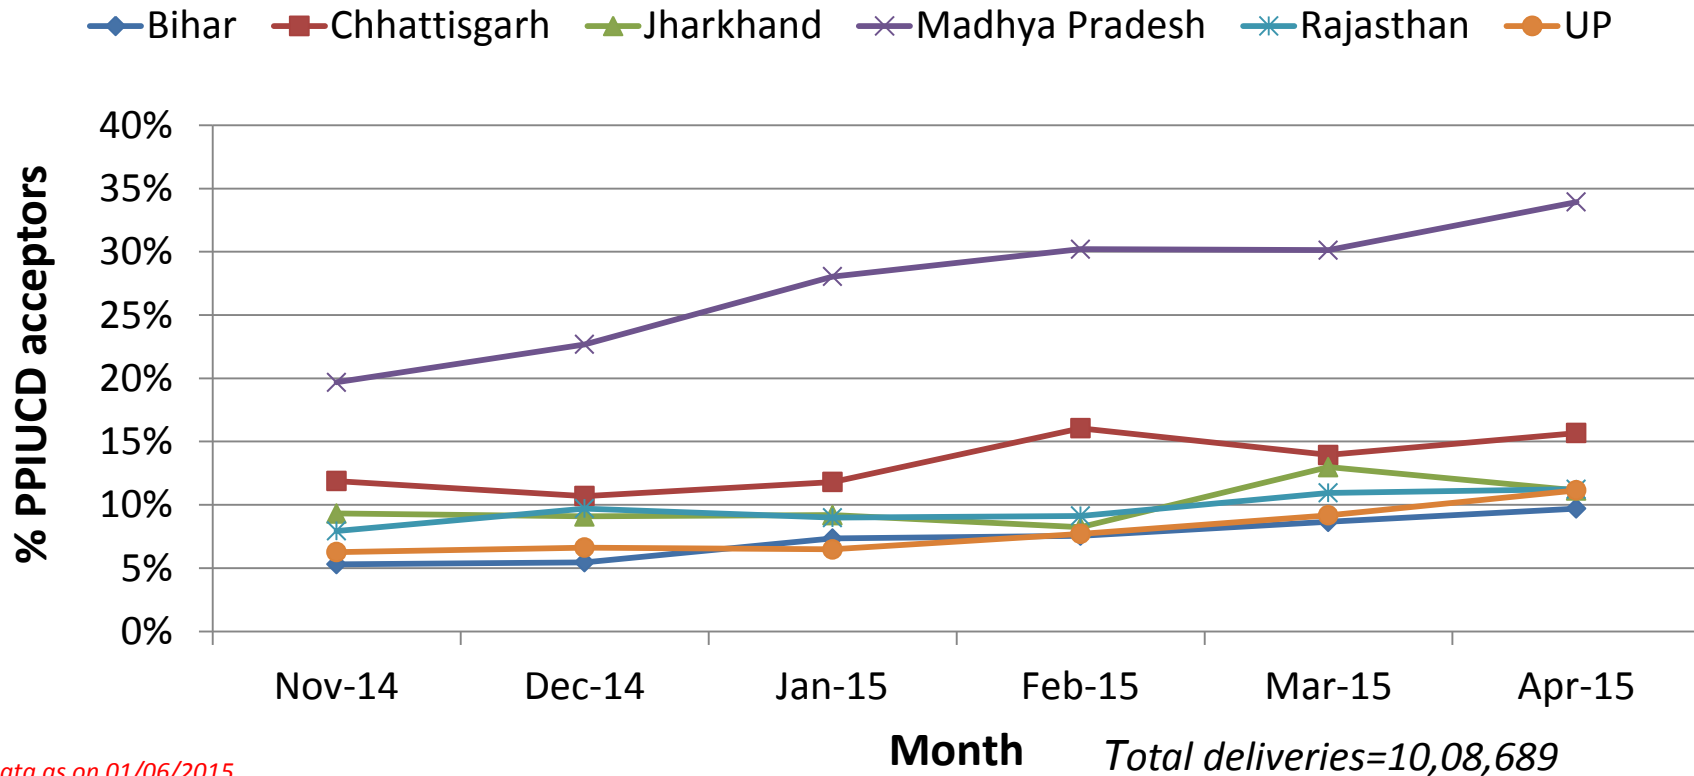

Proportion of PPIUCD Acceptors Among Institutional Deliveries (Jan-11 to Apr-15)

Trend of PPIUCD Acceptors among Institutional Deliveries

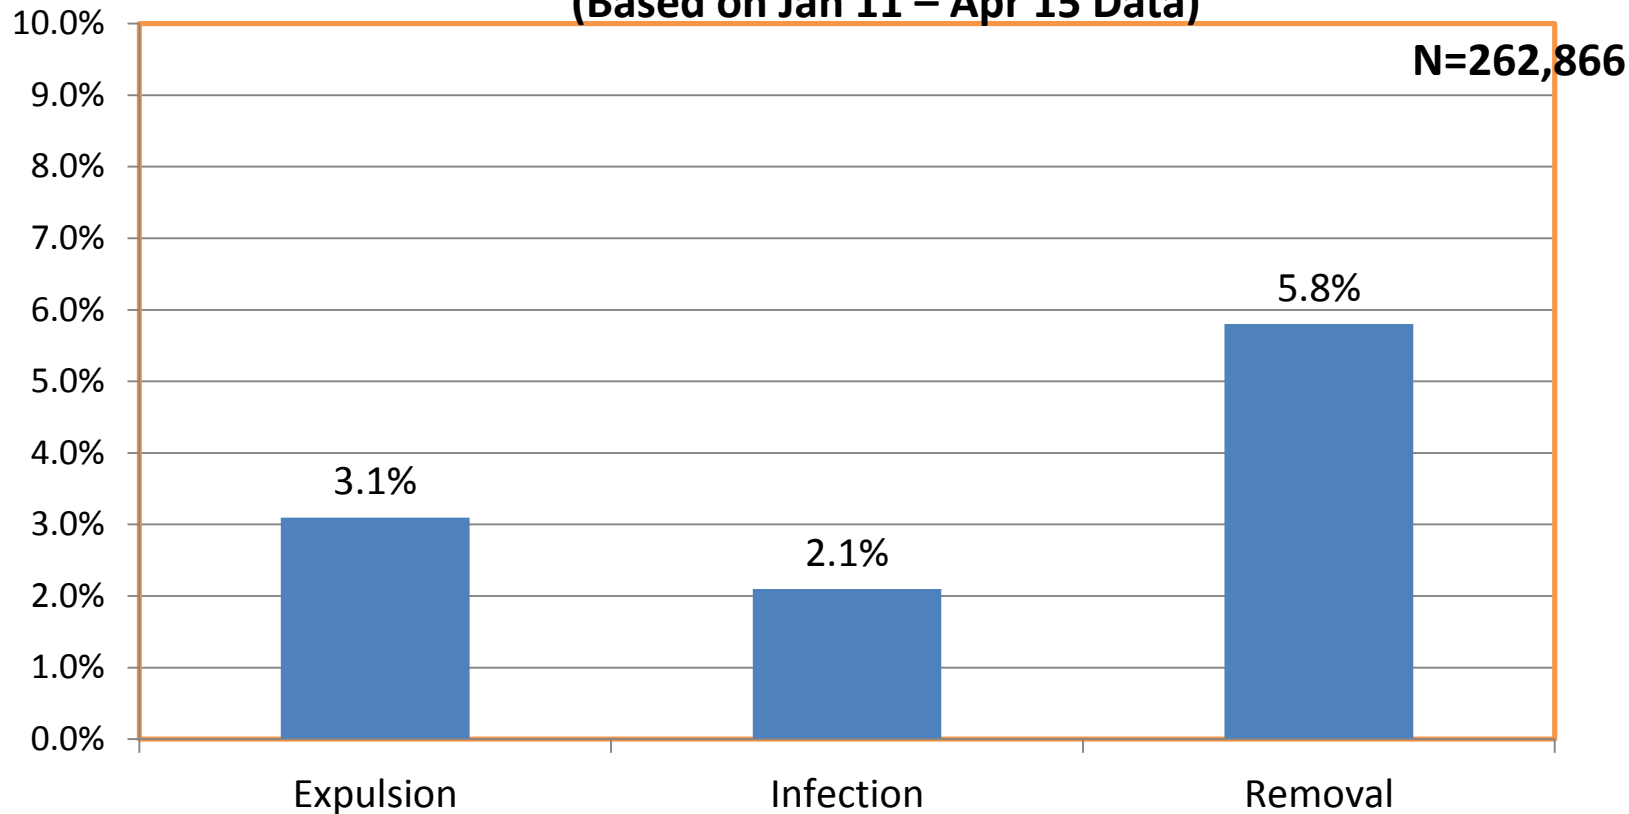

6-HFS (Nov 14 to Apr 15)

Data as on 01/06/2015

Follow-up Findings

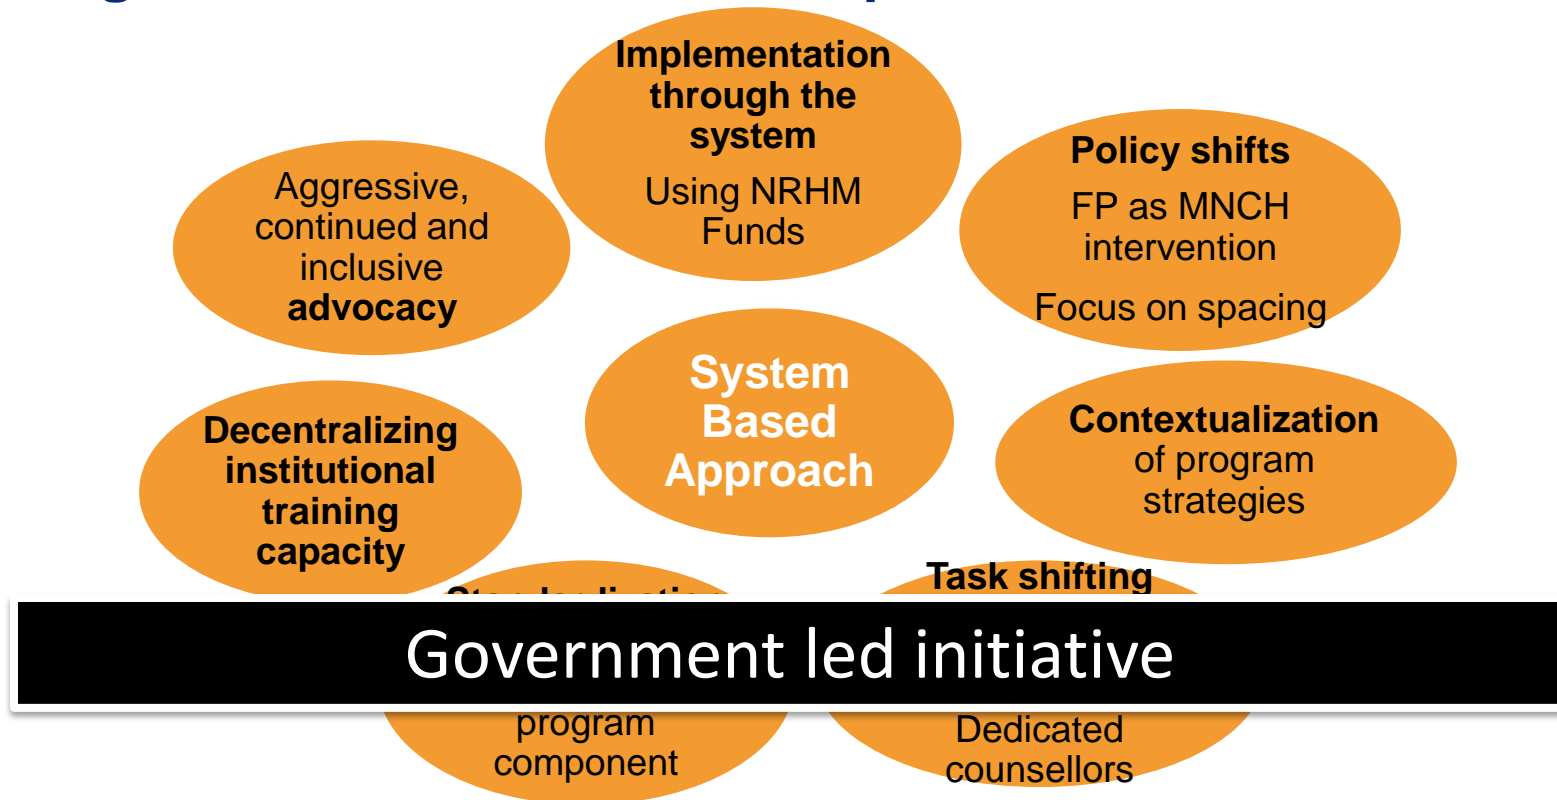

(Based on Jan 11 – Apr 15 Data)

Data as on 01/06/2015

Strategies for Successful Scale-up

Investing in Quality during Scale-up

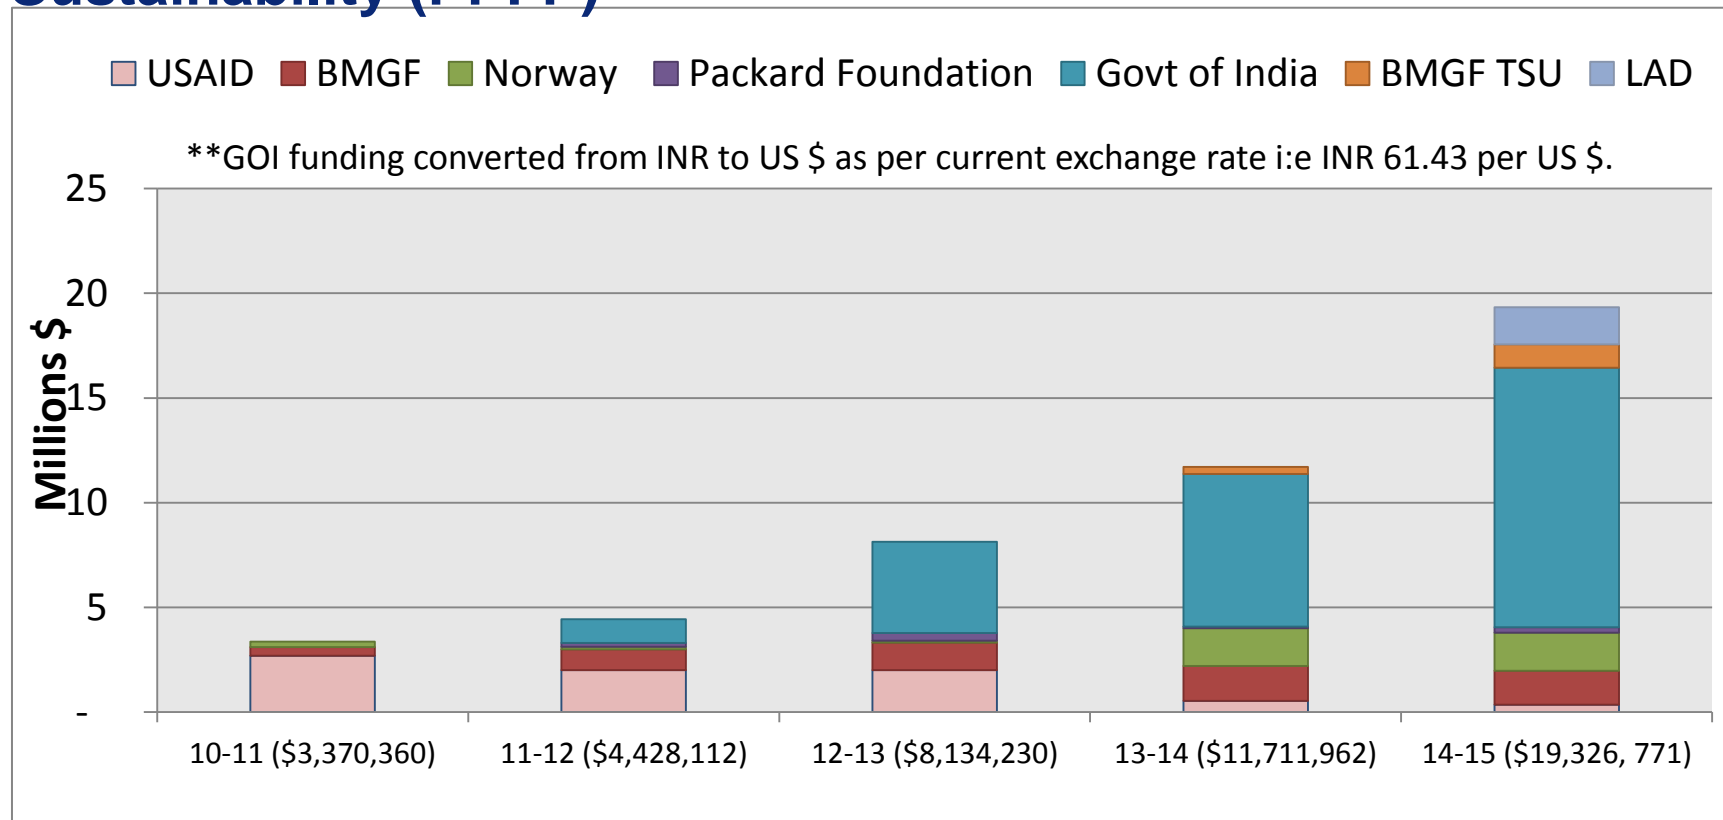

Annual Explosion Rates

Expulsion rates have remained at acceptable level even after rapid scale-up and withdrawal of external TA from all but 6 states of India

* Till Apr-15
